

## Maintenance Guide for SkyView

### Regular Updates

- **Dependencies:** Regularly check and update the dependencies listed in **requirements.txt** to their latest versions to ensure compatibility and security.
- **Frameworks and Libraries:** Keep Python, Flask, OpenCV, and other critical frameworks up-to-date to leverage improvements and patches.

### NASA API Integration

- If the current NASA API key becomes invalid or the API service is disrupted, please follow these steps to obtain a new API key:
  - Visit the official NASA API website at NASA API's.
  - Register for an API key by providing the necessary details
  - Once you receive your new API key, replace the old key in the application configuration with the new key to restore full functionality

### Installation

- To install the SkyView application, please follow the detailed steps provided in the **User Guide**. This guide contains comprehensive instructions to help you set up and configure the application correctly on your system.
- The **User Guide** is located in the docs/ directory of the SkyView repository

### Contact Us

For further assistance or additional information about the SkyView project, please do not hesitate to contact us:

- **Mario Rohana:** Mario.rohana@e.braude.ac.il
- **Ibraheem Sabaane:** ibraheem.sabaane@e.braude.ac.il
